

Premium Turf Product Data

PREMIUM TURF	
FIBER:	Radici 00532 Polyethylene Fiber and Everblade 4200 A-0 Springset Nylon
COLOR	LAET Tweed or ET Green
YARN SIZE	1250/8 Ply - 10,000 Denier Monofilament P.W. - 125 Microns thick combined with a 4200 / 8 Ply Monofilament Nylon
GAUGE	1/4"
STITCH RATE	11.5 stitches per 3 inches +/- 1/2"
PILE HEIGHT	45mm - 1 3/4" P.E. and 40 mm 1 5/8" Nylon
FACE WEIGHT	71 oz 8 year fade warranty
PRIMARY BACK	8 oz. double backing: 13 pick woven polypropylene plus a 15 pick FLW capped polypropylene or equal
SECONDARY BACK	20 oz. urethane with holes for landscaping
WIDTH	15'
SHIPPING WEIGHT	11 lbs. per linear foot.

PRODUCT INFORMATION

PREMIUM TURF has found its place into the landscape America collection because of the wonderful color and the non-glare. For maximum pile retention always fill with 1-2 lbs. per square foot of sand and 1 lb of rubber per square foot. The soft subtle polyethylene has a special texturing effect that makes the turf look like real turf. The sieve size for the rubber is smaller than normal. This will allow the rubber to work its way through the nylon down into the turf. We also add additional urethane secondaries. This allows the backing to be stronger.

The product has found its place in the Landscape America collection. The wonderful color, and the non-glare tencate polyethylene. The nylon adds a new foundation for the turf that helps and cushion and causes the P.E. to regain its original appearance after traffic has depressed the pile.
