FACE WEIGHT	40 oz 8 year warranty - fade: limited warranty
PRIMARY BACK	Propex 2906 Matrix 18 pic woven with a 2.10 oz non woven polypropylene cap total weight 6.1 oz or 2470 FLW 18 pick
SECONDARY BACK	All weather unitary
WIDTH	15'
SHIPPING WEIGHT	5.5 lbs per linear foot - unitary
FLAMMABILITY	Passes DOC-FF-1-70

DUE TO COMPLEXITY OF TEXTURING EXPECT SOME STRIATIONS TO OCCUR IN THE CARPET FACE

PRODUCT INFORMATION

PUTTING GREEN was originally designed for use as the fringe around greens and is still used for that. In 1997 a customer discovered that PUTTING GREEN had a stimp speed for 10 or 11. Usually 2 -3 lbs. per sq.ft. of 20-60 grit silica sand is used. Do not over sand. Keep the sand about 1/8" below tips. The sand will not be visible. Rake a couple of times during application so gravity will pull the sand level.

WHY PUTTING GREEN IS THE BEST

1. No Pile Direction- Ball rolls true in each direction.
2. PUTTING GREEN offers a better value because you do not have to spend hours packing and rolling.
3. PUTTING GREEN has the beauty of natural green; it is more realistic looking because of the two - color tweed.
4. The 'spring-set' monofilament yarn lasts longer and walks softer.
